
New Mexico Humates

Liquid Humic Acid

All natural soil conditioner

- A concentrated source of humic acids 12% Humic Acid (by weight)
- Humic acid extracted from high-quality oxidized lignite
- Adds organic material by form of liquid humic acids to your soil to enhance uptake of nutrients and stimulate soil life

Net Weight 30 lbs.

Application Rate:

1- 1.5 gal. per acre as a foliar application, 2 – 3 times per growing season recommended for row crops and forages. Plants need to be just past the seedling stage - about 25% coverage of the ground before the first application. Second application is usually just before flowering, or just before the onset of the reproductive stage of the crop. The 3rd application would be early in the grain fill or fruit/vegetable sizing stage.
