
New Mexico Humates

Soluble Humic Acid

All natural soil conditioner

- A concentrated source of humic acids which makes a liquid solution containing up to 15% Humic Acid (by weight)
- Solution is stable over a broad range of pH (0.5-14) and can be mixed with any liquid fertilizer without unexpected precipitation
- Adds organic material in liquid form with a high percentage of humic/fulvic acids to your plants to enhance uptake of nutrients

Net Weight 30 lbs.

Application Rate:

2-3 lbs. per acre as a foliar application, 2 – 3 times per growing season recommended for row crops and forages. Plants need to be just past the seedling stage - about 25% coverage of the ground before the first application. Second application is usually just before flowering, or just before the onset of the reproductive stage of the crop. The 3rd application would be early in the grain fill or fruit/vegetable sizing stage.
